# FLEXIBLE CUBICLES

*Innovation for the welfare  
of your animals*

# *SpeedFlex*

## A new generation of cubicles

SPEED France has a complete offering of flexible cubicles, adaptable to any farm and to any herd size.

Thanks to our know-how and our technology, we manufacture our cubicles in many sizes, shapes and colours, adaptable for single or double rows.

## & a cutting-edge technology

SpeedFlex® is the result of many years of research and development, the full sized cubicles ensure a maximum of comfort and safety for the animal.

The unique structure of our cubicle offers a unique compromise between rigidity and flexibility.

### **Core**

Flexibility,  
shape memory

### **Outer Skin**

Rigidity, stability

SPEED France aims for a continuous improvement of performance and quality, without compromising strength. Our products are tested on a regular basis in pilot farms.

*We work in collaboration with research institutes such as the INRAE and the Veterinary School of Lyon.*

# Why *SpeedFlex*

- Supple enough to provide a maximum of comfort.
- Rigid enough to keep the animal in the stall.

- Your animals lie down easily, your animals feel better
- More comfort, no harmful static energy buildup, no pressure points on the animals
- Reduces injuries and vet costs
- Full sized for increased stability and shape memory return
- Optimise your farm

+

+

=

When your cow  
is less stressed

has fewer  
injuries

remains lying  
down for longer

your cow  
produces more!

# The *SpeedFlex* neck cable

This cable molds itself to the shape of the cow's neck, avoiding injuries when standing up.

The SpeedFlex® neck cable works perfectly with existing steel cubicles.

This again improves the cow's comfort and reduces their stress levels.

# SpeedFlex<sup>®</sup>

## at the trough

The SpeedFlex<sup>®</sup> Cubicle at the trough reduces competition for food access.

The flexibility of the cubicle reduces injuries and stress in busy areas!

A cleaner barn

Cows that are less stressed

Better access to food

Increased production !

# Flexible cubicles, with very strict specifications

## CUTTING-EDGE PRODUCTION PROCESS

SpeedFlex® cubicles are manufactured according to strict specifications defined by our R&D department.

We use the most recent production process, in line with all current regulations.

## SPEED'S QUALITY COMMITMENT

From the selection of the raw materials to the postproduction quality test, every step is taken with the greatest of care, the entire company is engaged to ensure the highest quality.

SPEED France quality checks the individual cubicle during and after production to ensure that each and every one meets our rigorous standards.

## INDUSTRIAL TRACEABILITY

Each cubicle has a unique serial number. Traceability from production to end-user is guaranteed.

Each SpeedFlex® cubicle is covered by the SPEED France warranty.
